

Project Intelligent Robotics Assignment #4

This will be the final assignment for this project. With this assignment we start the free project phase. The objective is to formulate a scenario and your goals for the project.

Task 4.1 Scenario: Gather as a group and discuss ideas for a scenario. Make sure to take notes during the whole process!

Task 4.2 Presentation: Present and discuss the sketched scenario with the supervisors.

Task 4.3 Documentation: Write one document which describes the scenario. The document should at least cover the following points:

- Description of the scenario.
- Available hardware.
- State of the art.
- Available packages / solutions.
- Projects previously conducted at TAMS.
- Goals / milestones.
- List of tasks.
- Personal interests / group assignment.

The document should be 8-10 pages A4 11pt Latex 1 column and is due June 10th, 2016.
