# Pose Estimation for Robotic Soccer Players in the Context of RoboCup

Judith Hartfill

University of Hamburg  
Faculty of Mathematics, Informatics and Natural Sciences  
Department of Informatics

**Technical Aspects of Multimodal Systems**

November 28, 2017

# Outline

1. Motivation
2. RoboCup
  - RoboCup Soccer Leagues
3. Pose Estimation
  - Pose Estimation Approaches
  - Particle Filter
  - Problems
4. Approaches in Robocup Soccer
  - Humanoid Kid Size League
  - Standart Platform League
5. Summary
6. Conclusion and Perspectives

Knowing own pose is essential for decision making.  
How can a robot know its pose on the field?

# Pose Estimation Approaches

## Pattern Matching

[6]

- ▶ Least-squares linear regression problem

## Visual Compass [3]

- ▶ Visual map
- ▶ Histogram

## Particle Filter [4]

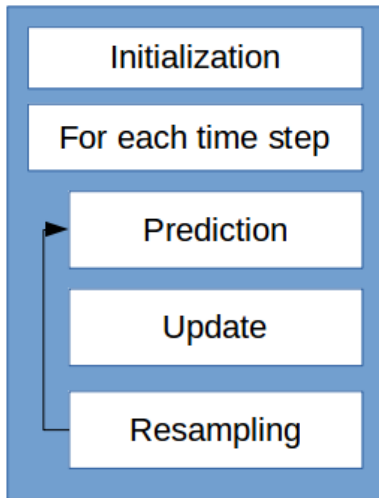

- ▶ Probabilistic method
- ▶ Multiple sensor inputs

<sup>8</sup>[https://upload.wikimedia.org/wikipedia/commons/b/b0/Linear\\_least\\_squares\\_example2.svg](https://upload.wikimedia.org/wikipedia/commons/b/b0/Linear_least_squares_example2.svg)

# Problems in Humanoid Kid Size League

Motivation RoboCup Pose Estimation Approaches in Robocup Soccer Summary Conclusion and Perspectives References

- ▶ Odometry hard
- ▶ Bad vision
- ▶ Computationally limited
- ▶ Symmetry of the field
- ▶ Other robots occluding view
- ▶ ...

# Approaches in Humanoid Kid Size League

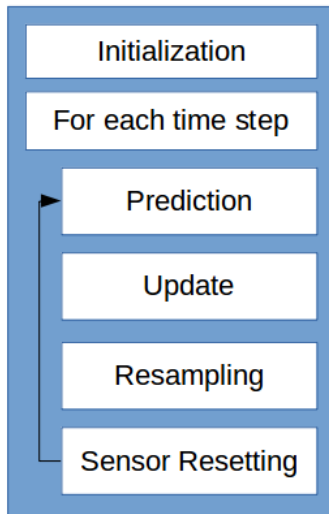

- ▶ Reminder: Odometry hard
- ▶ Rhoban [2]:
  - ▶ 3D Particle filter
    - ▶ Magnetometer
    - ▶ Field borders and goals posts
  - ▶ Foot pressure sensors
    - ▶ Action model less erroneous
    - ▶ Visual observations scored

J. Hartfill – Pose estimation

# Approaches in Humanoid Kid Size League

- ▶ Reminder: Bad vision
- ▶ ZJU[5]
  - ▶ Particle filter with *sensor resetting*
  - ▶ Input noisy
  - ▶ Propability of particles low
  - ▶ Replace some particles with noisy ones

# Approaches in Standart Platform League

- ▶ Improvement: Communication
- ▶ Camellia Dragons [1]
  - ▶ *Observer view* robot observing field
  - ▶ Sharing information via WiFi
  - ▶ Resampling particles with additional information
  - ▶ Not natural like in usual soccer

Pose estimation

12

<sup>12</sup>[http://alife-robotics.co.jp/homepage2018/members2017/icarob/data/html/data/OS\\_pdf/OS12/OS12-4.pdf](http://alife-robotics.co.jp/homepage2018/members2017/icarob/data/html/data/OS_pdf/OS12/OS12-4.pdf)

- ▶ Hardware
  - ▶ Foot pressure sensors: Better data for particle filter
- ▶ Software
  - ▶ Sensor resetting: Escape from bad estimates
  - ▶ Observer view: Use all capacities

# Conclusion and Perspectives

Motivation

RoboCup

Pose Estimation

Approaches in Robocup Soccer

Summary

Conclusion and Perspectives

References

- ▶ Particle filter popular and reliable
- ▶ Workarounds for bad sensor data
- ▶ Hardware improvements useful
- ▶ Communication becoming more important
- ▶ Better computers/ sensors

# Conclusion and Perspectives

Motivation

RoboCup

Pose Estimation

Approaches in Robocup Soccer

Summary

Conclusion and Perspectives
