speech synthesis

audio command recognition

Behavior

Motion: Three Phase motion

Move to the top of target

Strike motion

Retreat motion

Simulation

MarimbaBot Simulation Demo
University of Hamburg, TAMS
2023

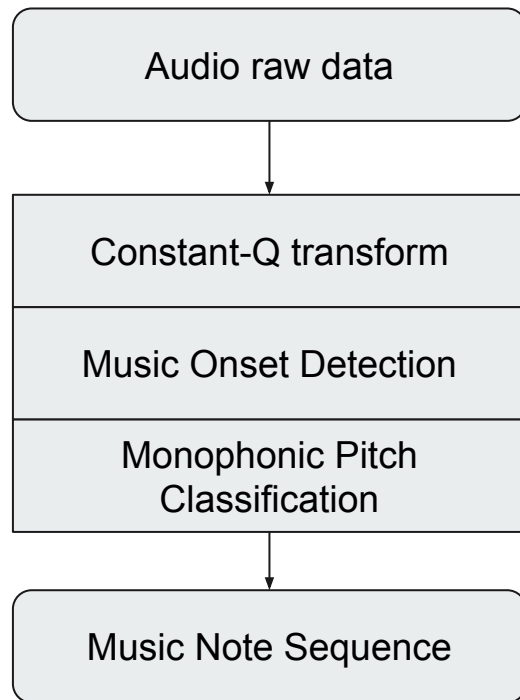

Hardware

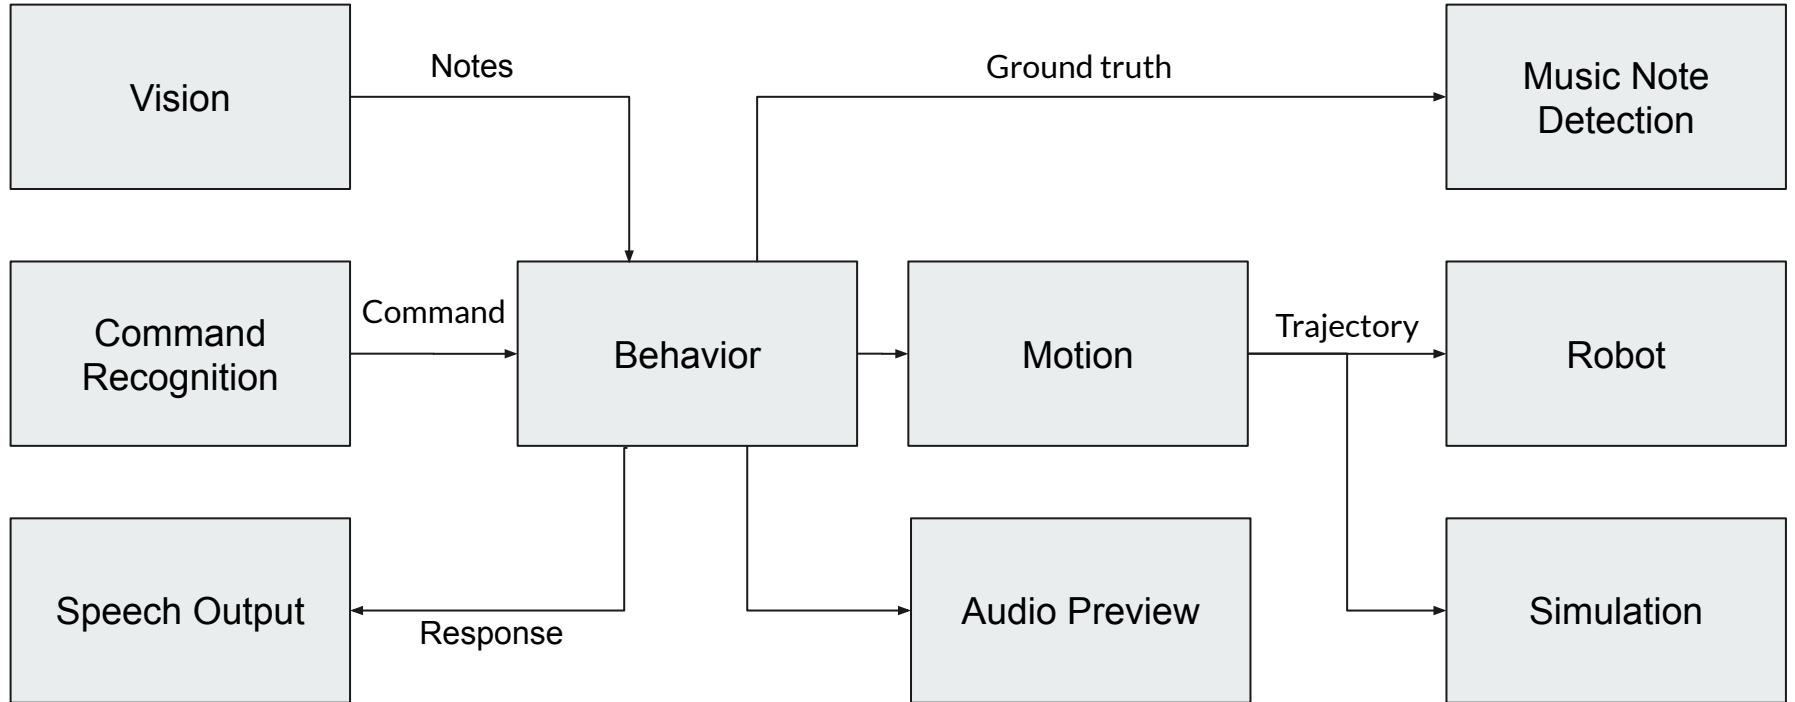

Music Feedback

*white lines denote candidates
green lines denote the detected notes*

System overview

Thank you for your attention !

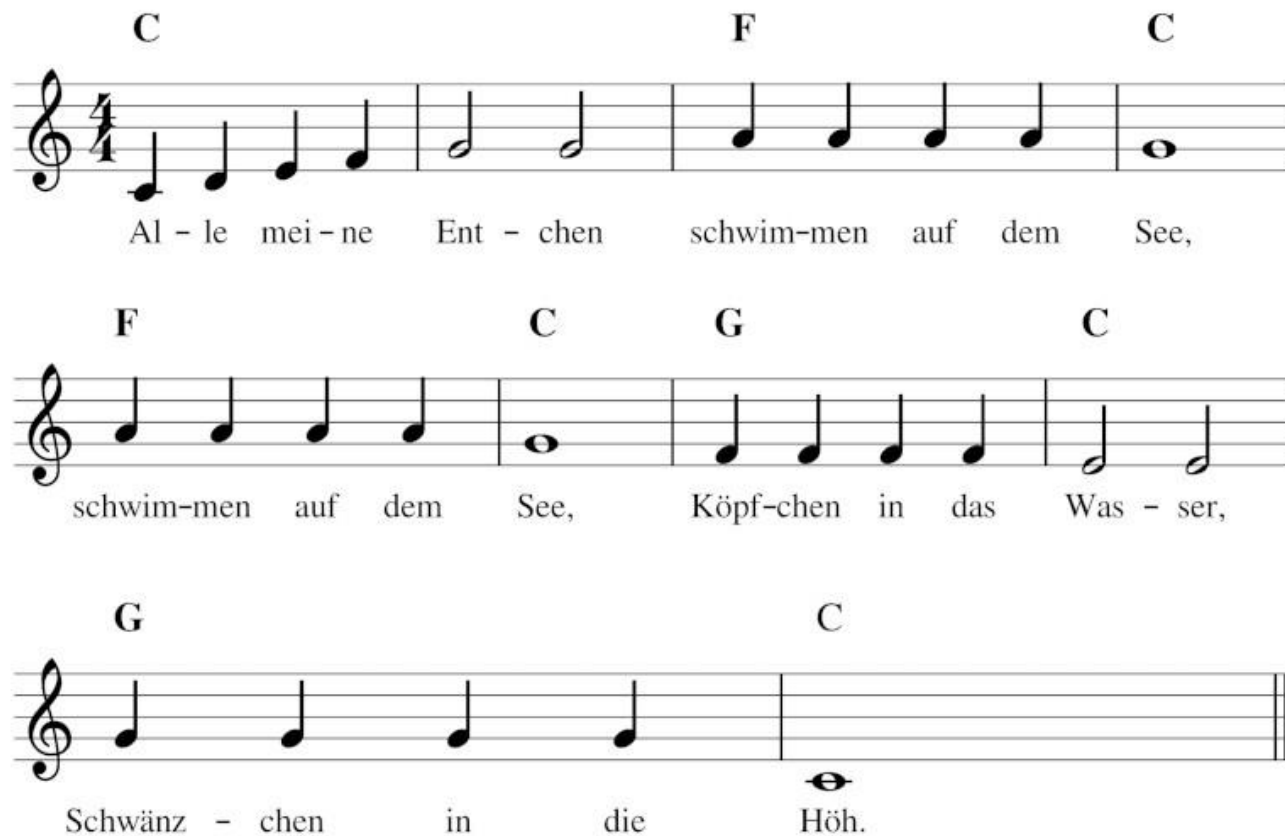

Appendix

Notes

All my Ducklings

C **F** **C**

Al - le mei - ne Ent - chen schwim - men auf dem See,

F **C** **G** **C**

schwim - men auf dem See, Köpf - chen in das Was - ser,

G **C**

Schwänz - chen in die Höh.

Notes

Frere Jacques

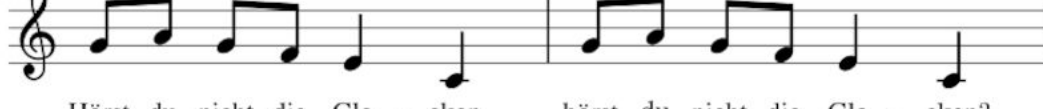

C

Brud - er Ja - kob, Brud - er Ja - kob,

schläfst - du - noch, schläfst du noch?

Hörst du nicht die Glo - cken, hörst du nicht die Glo - cken?

Ding, Dang, Dong! Ding, Dang, Dong!

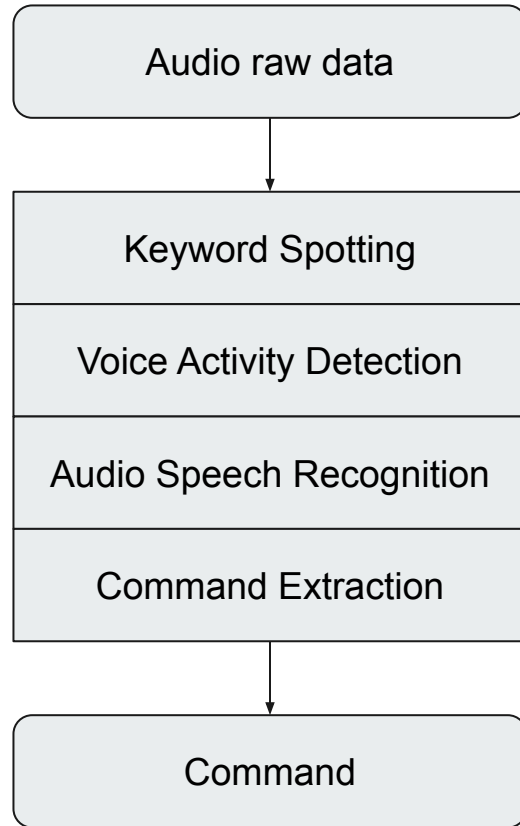

Command Examples

1. Firstly, say “**Hi, marimbabot**” to activate the speech recognition.
2. After you heard the beep, give the command as following examples:

Robot's Action	Command Examples
read the music sheet from white board	“read the music sheet”
start to strike the keys of marimba	“play the music sheet”
increase the playing speed	“play faster (by 20 bpm)”
decrease the playing volume	“play softer (by 2 steps)”
setup the speed	“play in 60 bpm”
repeatedly play the same song	“play in the loop”

Speech

ASR: Whisper

Multitask training data (680k hours)

English transcription

- 🗣️ "Ask not what your country can do for ..."
- 📄 Ask not what your country can do for ...

Any-to-English speech translation

- 🗣️ "El rápido zorro marrón salta sobre ..."
- 📄 The quick brown fox jumps over ...

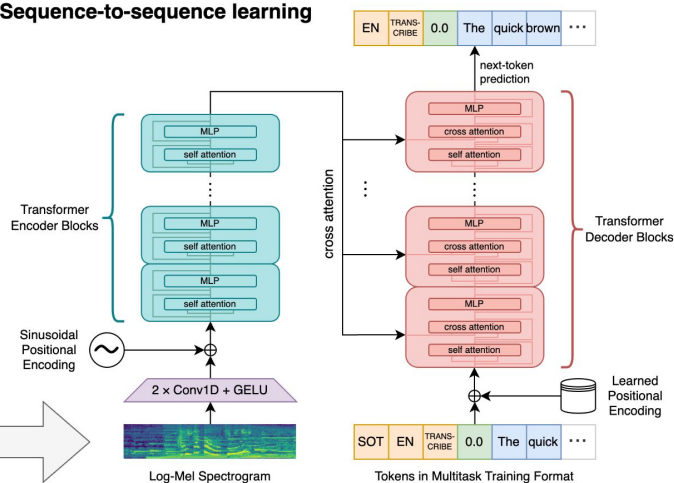

Non-English transcription

- 🗣️ "언덕 위에 올라 내려다보면 너무나 넓고 넓은 ..."
- 📄 언덕 위에 올라 내려다보면 너무나 넓고 넓은 ...

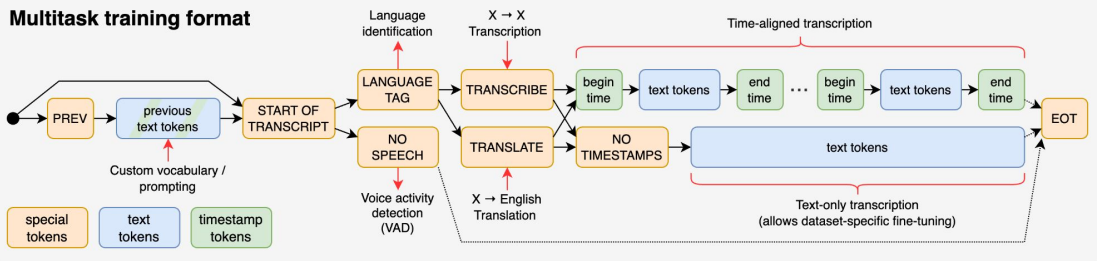

No speech

- 🎧 (background music playing)

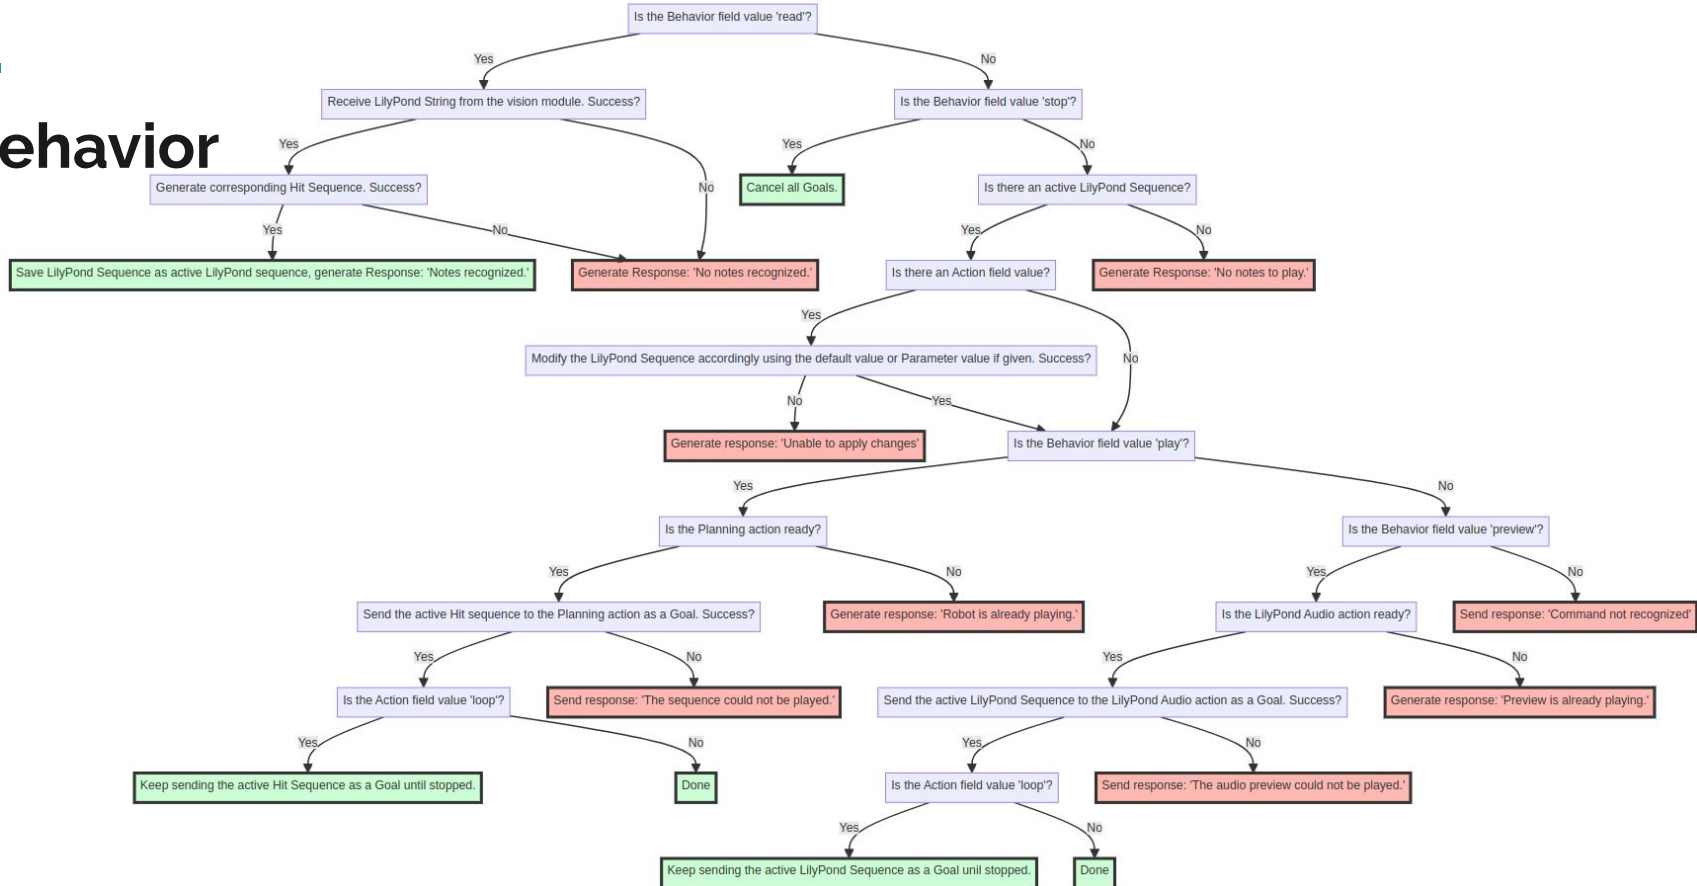

Sequence-to-sequence learning

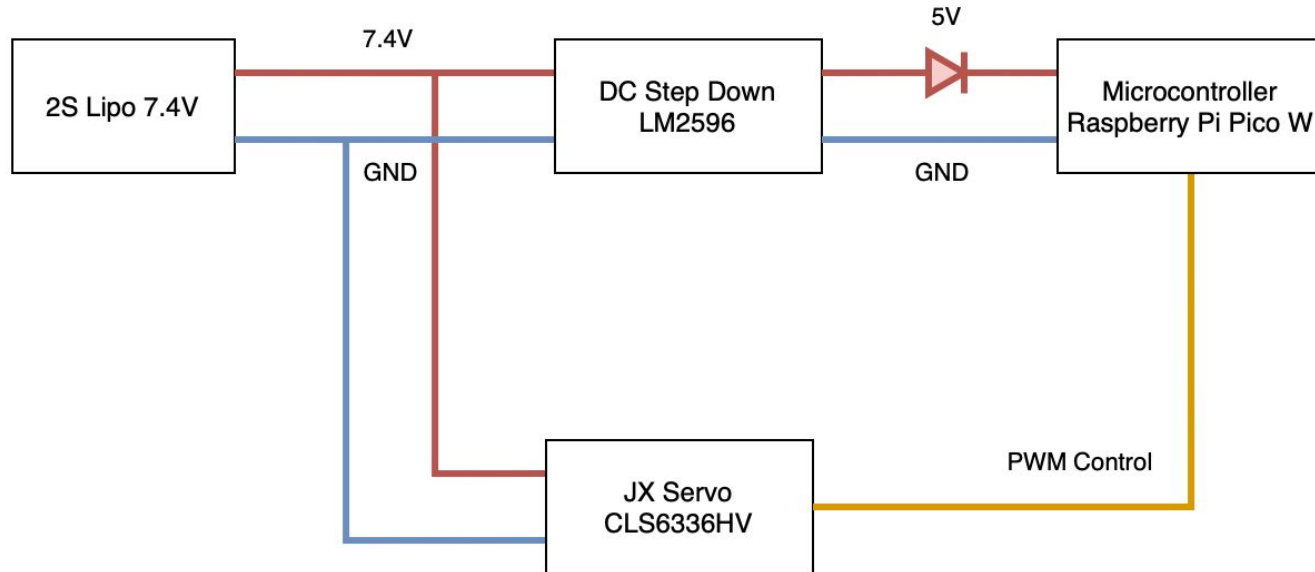

Multitask training format

Behavior

Electronic Design

Firmware Protocol

Command	Response	Command Description	Response Description
s <value>	ok, err_input_num, err_input_range	Commands the servo to move to the value	Errors for invalid number formats or numbers out of range of the safety limits or ok for acknowledgement
p	p <value>	Requests the current target value	Returns the current target value
l	l <min_val> <max_val> <val_resolution>	Requests the limits of the device	Return the max and min value bounds and the resolution of the value parameter (0-res)
<invalid_command>	err_cmd	Any command other than the listed ones	Error code for and invalid / unknown command
